

GEORGE CREEK  
RIVER DISTRIBUTION SYSTEM

1961 ASSESSMENT

\$ 1,440.00

Forward: This distribution system came under the supervision of the State Engineer in accordance with Court Action and the first distribution portion of the State Engineer was accomplished at the Annual George Creek Water Users Meeting held in Yost, Utah at 1:00 PM. April 7, 1960.

BASIS OF ASSESSMENT:

1. The 1961 Assessment is based on an acre-foot delivery during 1960. High water interest will be assessed only if the high water is delivered to their rights. The peak flow of George Creek did not rise above 66.0 CFS, therefore, the high-water rights will not be assessed.

CALCULATION OF ASSESSMENT:

It was reported that 2,566.92 Acre-feet of water was used during 1960. \$ 1,440.00 divided by 2,566.92 equals \$ .560983592 cost for one pro-rata acre-foot of water. This cost multiplied times the reported amount of water used by each water user on the George Creek Distribution System equals their pro-rated share of the 1961 Assessment.

PROOF:

\$ 0.560983592 times 2,566.92 equals \$ 1,440.00

Wallace Spencer:	1,174.88 times	\$ 0.560983592 equals:	\$ 659.09
George Creek Irr. Co:	1,392.04 times	\$ 0.560983592 equals	\$ 780.91
			<u>\$ 1,440.00</u>
